

Maths

The Heinemann maths scheme is the core element of maths throughout the pre prep and prep departments. Following the National Numeracy strategy, it provides a way of viewing and making sense of the world. All children are encouraged to analyse and communicate their ideas and to tackle a range of written and practical tasks, mental arithmetic and real life problems. At Aldenham we use a variety of approaches to enable each child to not only enjoy maths, but gain confidence in their own ability and achieving their true potential.
